Art Unit: 2651

1. This office action is in response to the amendment filed on August 04, 2005.

EXAMINER'S AMENDMENT

- 2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
- 3. Authorization for this examiner's amendment was given in a telephone interview with attorney Mr. Michael L. Robbins on November 16, 2005.
- 4. The application has been amended as follows:
- 10. (Currently amended): A system for storing and retrieving information, comprising:

a disk;

an actuator having a voice coil motor for pivoting the actuator; and a head operably associated with the actuator, the head being adapted to communicate with the disk;

wherein a current applied to the voice coil motor pivots the actuator according to the current;

wherein a voltage potential switches at a switch rate between a first voltage potential and a second voltage potential such that an approximately constant current is delivered to the voice coil motor; and

Art Unit: 2651

wherein the switch rate can vary with a desired precision of movement;

wherein when a command is received to remove the head from communication

with the disk, the switch rate is reduced relative to an average switch rate.

- 11. (Canceled.)
- 12. (Currently amended): The system of claim 11 10, further comprising a power driver electrically connected with the voice coil motor;

wherein:

the power driver is a linear driver;

the first voltage potential is achieved when a first current results from substantially saturating the linear driver; and

the second voltage potential is approximately zero.

Reason for Allowance

5. The following is an examiner's statement of reasons for allowance:

Claims 5-10, 12 which are now renumbered as 1-7 are allowable over the prior art of record because none of the prior art of record teaches or fairly suggests removing the means or a head from communication with a disk when power driver switches between applying a first voltage potential and a second voltage potential across the two terminals of a VCM such that an approximately constant is delivered to the VCM.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication from the examiner should be directed to Fred Tzeng whose telephone number is 571-272-7565. The examiner can normally be reached on weekdays from 9:30 am to 6:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Hudspeth can be reached on 571-272-7843. The fax phone numbers for the organization where this application or proceeding is assigned are 571-273-8300 for regular communications and 571-273-7565 for After Final communications.

8. Informal regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
